# CORPORATE PHILOSOPHY

Your advantages

# philosophy

The basic principle of our business philosophy is coping with our customers' individual requirements. We put at your disposal not only high class, but also user-friendly and economical products on highest quality level to grant this. Since the formation in 1999 we evolved into a high qualified manufacturer of non-woven material and reached a leading position in the market.

We see ourselves not only as a reliable manufacturer and supplier, but also as creative director and co-designer. Innovative capacity, flexibility, quality, customer-specified focusing and adherence to delivery dates are very much valued by our clients. Hereby we rely on partnership and team-work.

With ever available raw-materials and individual design and packing solutions you get your product on direct way. Because of our customer-specified contract manufacture you'll stay flexible.

As a full-service provider we guarantee a smooth handling in all segments of contract labelling – from the product idea and the first offer, over the preparation of samples, up to the completion of your order. In the sense of a fair co-operation at eye-level we pursue an open, intelligible communication policy: An active and direct communication with all partners is our strength and a guarantor for the common success.

**Contract labelling is a matter of trust – trust in us!**

## YOUR ADVANTAGES

- flexibility
- quality
- focusing
- adherence to delivery dates
- full service

## Your benefit

# activities

Our customers especially profit by the benefit of our business activities: From the raw material over basic packing materials and suitable dispenser systems up to microbiological expertise according to the latest standards you get everything from one source, from a reliable supplier. At the same time, as service provider we take over the graphical design of your products and packing in common dialogue.

We are your partner, who can convert, pack and send almost all non-woven rolls in the private label production. Thereby our products are to 100% in line with the requirement of our customers.

Our services are supported by a highly qualified, multilingual team.

That means for you: less expense, fixed contact persons, reliable processes, latest standards and deliveries exactly on schedule.

## YOUR BENEFIT

- less expense
- fixed contact persons
- latest standards
- just-in-time delivery

# PRODUCT PORTFOLIO

Your opportunities

# portfolio

As established manufacturer and supplier of non-woven products we manufacture for enterprises of the health service, for food processing factories and for the industry, especially the automotive industry. Our automated non-woven-cloth-winders follow your individual requirements. Hereby we handle any task for you: from the smallest amount up to large-scale production.

Dry, perforated non-woven rolls belong to our business activities as well as saturated non-woven products. We use either customer-provided saturate dilution or supply ready saturated non-woven rolls.

To make your product satisfying, it needs an appropriate, user-friendly packing. If boxes, buckets, cans or refill packing, together with you we select the best dispenser system for your product and assemble your product with inserts like disinfectant sachets, instruction leaflets or information brochures.

We supply dispenser systems and the belonging wall mountings in almost every order size.

## YOUR OPPORTUNITIES

- saturated non-woven products
- dry non-woven products
- dispenser systems
- wall mountings
- inserts
- packaging
- labelling

# Your safety

# source

Under hygienic production conditions we use web-form non-woven materials of a grammage 18–120 g/m<sup>2</sup> into different products. We always have our raw material for the non-woven production and for the packing in stock and we supply them fast and reliable, whenever you need them. Your advantage: small warehousing and storage costs. And you always have the raw material and products that you need for further processing, ready-made, in the required quality.

Thoughtful warehouse- and shipping logistics guarantee a reliable and fast delivery.

You can find our products both national and international, mostly in private label packing. Developed and assembled customer-oriented, they meet all requirements in functionality, design and economics. Absolute reliability with regard to quality, punctuality and sustainability is our obligation and a matter of course for us. This means concentrated expertise that we provide daily.

Our goods stand out for quality MADE IN GERMANY at fair prices. We enjoy the great trust of our customers and have the responsibility to do justice to this.

## YOUR SAFETY

- available raw-material
- available packing
- just-in-time deliveries
- environmental acceptability
- quality MADE IN GERMANY

## Your product

# Label

As competent partner we offer you the opportunity to realize your product ideas by helping you with your individual product concepts. The specific characteristics of each application we determine in close dialogue with our customers: With a lot of tact and comprehensive know-how in materials and technologies we work out the right solution for each requirement. We place special emphasis on the professional support by a personal contact person.

For our products we guarantee a high degree of user-friendliness and we ensure that they comply with the latest statutory requirements. The supply of product-related documents belongs to this as well as the issue and alteration of official reports.

According to your corporate design, in our in-house graphics department we create your labels and stickers. Hereby it makes no difference if you need product-, batch- or dispenser labels. Also we design the packing media according to your requirements.

If desired we supply your customers in self-presentation also in third-party-deal, from the smallest amount up to large-scale deliveries.

So you save capital costs, personnel expenses and transport costs and you can intercept order peaks. In short: You save expenses and gain possibilities to establish your USP in the market.

## YOUR PRODUCT

- user-friendliness
- statutory requirements
- corporate design
- direct delivery
- USP
